GUARDER®

C O R P O R A T I O N

OSHA Compliant Safety Air Guns, Pneumatic Hand-Held Vacs, and Syphon Spray Guns

It's Easy to Choose Guardair

- ✓ OSHA compliant Safety Air Guns
- ✓ Comprehensive product line
- ✓ High quality; Superior value
- ✓ Ergonomic designs
- ✓ Timely delivery
- ✓ Experienced Customer Service staff
- ✓ Expert Engineering support
- ✓ Applications expertise

GUARDAIR
CORPORATION

We take the mystery out of OSHA compliance.
Complete safety information on pages 3 and 4.

Table of Contents

It's easy to find the right Guardair Safety Air Gun to meet your needs.

1. Choose the Series:

- Ultra
- Classic+
- Lazer
- Thumbswitch
- Big Guns

2. Choose the Application:

- Bench-Top
- Extended Reach

3. Choose your Options:

- Nozzle
- Trigger
- Extension Length

MEETING OSHA REQUIREMENTS

At Guardair Corporation, our number one concern is worker safety. With this focus in mind, we only manufacture safety air guns and spray equipment which meet or exceed all applicable OSHA standards.

OSHA regulations can often be lengthy and confusing, however one thing is certain. Compressed air can be extremely dangerous if misused, and horse-play in the workplace can lead to serious injury. This is why the following OSHA regulations pertaining to output pressure, chip guarding and noise are of particular relevance to users of safety air guns and spray equipment.

OUTPUT PRESSURE

Factory air lines normally operate at pressures between 80 and 120 psi (pounds per square inch). Most pneumatic tools, including air guns, require such high pressures to operate effectively. However, OSHA requires that in the event such air lines are dead-ended (for example, if the tip of an air gun is blocked) the static pressure at the point of blockage be no more than 30 psi.

All Guardair safety air guns meet this requirement.

Refer to **29CFR Part 1910.242 (b) Hand and portable powered tools and equipment, general and OSHA Instruction STD 1-13.1 (OSHA PROGRAM DIRECTIVE #100-1).**

CHIP GUARDING

Whenever blowing off debris with an air gun in close quarters, workers are subject to "chip fly-back". This term refers to the tendency of loose particles or chips to fly back into the operator's face, eyes or skin. For operations which require close-in work, OSHA requires that "effective chip guarding" be incorporated into the workplace.

Many Guardair safety air guns designed for close-in work incorporate a protective air cone for effective chip guarding.

Refer to **29CFR Part 1910.242 (b) Hand and portable powered tools and equipment, general and OSHA Instruction STD 1-13.1 (OSHA PROGRAM DIRECTIVE #100-1).**

NOISE

Excessive noise generated in the workplace can be harmful. To address this problem, OSHA has developed permissible daily noise exposure specifications. Since safety air guns often contribute to high levels of occupational noise, the use of low noise, safety air guns can be an important component in moving towards noise compliance.

Many Guardair safety air guns incorporate proprietary noise limiting features.

Refer to **29CFR Part 1910.95 (a) Occupational Noise Exposure.**

APPLICABLE OSHA REGULATIONS

29CFR Part 1910.242 (b)

Hand and portable powered tools and equipment, general.

Compressed air used for cleaning. Compressed air shall not be used for cleaning purposes except where reduced to less than 30 psi and then only with effective chip guarding and personal protective equipment.

OSHA Instruction STD 1-13.1

October 30, 1978

Office of Program Operations

February 14, 1972

OSHA PROGRAM DIRECTIVE #100-1

To: National and Field Offices

Subject: Reduction of Air Pressure Below 30 psi for Cleaning Purposes

Attachment: Acceptable Methods for Complying with 41 CFR 50-204.8 and 29 CFR 1910.242(b)

1. Purpose. To provide guidance and examples of what alternate systems will meet the requirements of this section, and to clarify its intent.

2. Background. A number of inquiries have been received requesting a clarification of the meaning of 1910.242(b) also known as 41 CFR 50-2048 under the Walsh-Healey Act.

3. Interpretation. The phrase "reduce to less than 30 psi" means that the downstream pressure of the air at the nozzle (nozzle pressure) or opening of a gun, pipe, cleaning lance, etc., used for cleaning purposes will remain at a pressure level below 30 psi for all static conditions. The requirements for dynamic flow are such that in the case when dead ending occurs a static pressure at the main orifice shall not exceed 30 psi. This requirement is necessary in order to prevent a back pressure buildup in case the nozzle is obstructed or dead ended. See enclosure (1) for two acceptable methods of meeting this requirement. Also, there is no intent to restrict the diameter of the nozzle orifice or the volume (CFM) flowing from it.

"Effective chip guarding" means any method or equipment which will prevent a chip or particle (of whatever size) from being blown into the eyes or unbroken skin of the operator or other workers. Effective chip guarding may be separate from the air nozzle as in the case where screens or barriers are used. The use of protective cone air nozzles are acceptable in general for protection of the operator but barriers, baffles or screens may be required to protect other workers if they are exposed to flying chips or particles.

4. Action. Inquiries about subject section should be handled in accordance with this instruction.

5. Effective Date. This instruction is effective immediately, and will remain in effect until canceled or superseded.
Director, of Program Operations

29CFR Part 1910.95 (a)

Occupational noise exposure.

Protection against the effects of noise exposure shall be provided when the sound levels exceed those shown in Table G-16 when measured on the A scale of a standard sound level meter at slow response.

Table G-16 Permissible Noise Exposures

Duration per day, hours	8.0	6.0	4.0	3.0	2.0	1.5	1.0	0.5	0.25
Sound level dBA slow response	90	92	95	97	100	102	105	110	115

Guardair Protective Air Shield

- Primary air flow exits through the nozzle tip delivering full air pressure.
- Secondary flow exits through radial slots forming protective air cone preventing chips and other debris from flying back towards the operator as required by OSHA Safety Standard 29CFR1910.242(b).
- Should the tip become blocked, the entire air flow is diverted through the slots thereby limiting nozzle tip pressure to less than 30psi thus satisfying OSHA Safety Standard 29CFR1910.242(b).

goggles when using air guns.*

MV2000® PNEUMATIC VACUUM

Introducing the powerful, new MV2000. The first pneumatic vacuum that mounts on any vertical surface.

Virtually maintenance-free, the portable MV2000 has no moving parts to wear out. With no electric motor to generate sparks or burn out, the MV2000 eliminates electric extension cords -- potentially dangerous in wet environments and always a tripping hazard.

Generating high suction for industrial applications, the 13 pound MV2000 quickly and effectively vacuums up debris, metal chips, dirt, dust, and even finer materials, including powders and talc. Equipped with a liquid shutoff and drum drain, the versatile MV2000 also engineered to pickup liquids such as machine oils, lubricants, and other fluids.

MV2000	Part Number
Vertically Mounted Pneumatic Vacuum	MV2000

Air Usage (scfm)	21
Vac Flow (scfm)	73
Vacuum Head (inH2O)	77

CS2000® PERSONNEL CLEANING STATION

Introducing the powerful, new CS2000.

Running off standard shop compressed air, the Personnel Cleaning Station pairs a proprietary, on-demand air-agitator brush attachment with a high-efficiency pneumatic vacuum. Thumb-switch activated, the air-agitator loosens and lifts particles airborne where the vacuum sucks them away safely and effectively. With no motor to burn out, the Personnel Cleaning Station is virtually maintenance-free. Vertical Mounting System (VMS) mounts on any vertical surface, saving valuable factory floor space.

Saves valuable factory floor space! Mounts on any vertical surface:

- Proprietary vacuum technology cleans workers quickly and effectively
 - Removes dust, powders, and particulates
 - from clothing and skin
- Rugged, polyethylene construction
OSHA compliant

HIGH PERFORMANCE CONNECTORS & COUPLERS

HIGH FLOW SERIES: Engineered to allow twice the flow of comparable sized standard connectors and couplers. Recommended for all Guardair products and for pneumatic tools such as small drills, screwdrivers and air hammers using 1/4" and 3/8" I.D. air hose. Couplers accept standard U.S. Industrial Interchange type connectors. Work Range: 40°F to 250°F (-40°C to 107°C); 0 - 150 psi.

ACCESSORIES AND REPLACEMENT PARTS

COILGUARD® NYLON AIR HOSE

NYLON RECOIL HOSE

- Self storing air hose stretches and recoils like a telephone cord
- Eliminates bulky hose reels, clutter of long air lines, hose dragging
- Made from tough, lightweight, resistant Nylon 11
- Resists most chemicals, including gasoline, oil and grease
- Spring guards provide additional strain relief
- Preinstalled brass swivel fittings (male) on each end
- Color: Blue (1/4"ID), Yellow (3/8"ID)

Part #	Hose ID	Hose OD	Hose Length	Fitting Size
14X12B03	1/4"	5/16"	12'	1/4" NPT
14X25B03	1/4"	5/16"	25'	1/4" NPT
14X50B03	1/4"	5/16"	50'	1/4" NPT
38X12B03	3/8"	13/32"	12'	3/8" NPT
38X25B03	3/8"	13/32"	25'	3/8" NPT
38X50B03	3/8"	13/32"	50'	3/8" NPT

COILGUARD® POLYURETHANE AIR HOSE

POLYURETHANE RECOIL HOSE

- Finest air hose available on the market
- Super flexible, 100% kink proof, low tension retractability
- Withstands tough industrial environments while maintaining resiliency
- Soft polyurethane finish will not scratch or mar work surfaces
- 18" pigtail on tool end minimizes tangling
- 4" pigtail on supply end for ease of connection
- Preinstalled brass swivel fittings (male) on each end. Color: Blue

Part #	Hose ID	Hose OD	Hose Length	Fitting Size
14X12B04	1/4"	3/8"	12'	1/4" NPT
14X25B04	1/4"	3/8"	25'	1/4" NPT
38X12B04	3/8"	9/16"	12'	3/8" NPT
38X25B04	3/8"	9/16"	25'	3/8" NPT

FLEX-ANGLE SWIVEL FITTINGS

- Unique, patented swivel fitting provides 360° of rotation, and up to 45° of angle
- Eliminates hose kinking
- Reduces hand, wrist, elbow and shoulder stress from heavy or non-flexible air hose
- Lightweight, steel construction
- Polyurethane dust cover protects rotating joint

Not designed for use with percussion or impact tools.

	Part #	Inlet	Outlet
	14NFMH05	1/4" FNPT	1/4" NPT
	14UMNMH05	1/4" US Industrial Interchange (M)	1/4" NPT
	38NFMH05	3/8" FNPT	3/8" NPT

SAFETY EXCESS FLOW CHECK VALVES

- Automatically shuts off air flow upon a sudden air line break
- Protects plant personnel and property from injury by "whipping" air hoses
- Allows full, unrestricted flow of air in normal open position
- Resets when repair is made
- Tamper proof
- Rugged aluminum construction

Part #	Inlet	Outlet
14H18	1/4" FNPT	1/4" FNPT
	Maximum Flow Capacity: 21 CFM @ 90 PSI	
38H18	3/8" FNPT	3/8" FNPT
	Maximum Flow Capacity: 48 CFM @ 90 PSI	
12H18	1/2" FNPT	1/2" FNPT
	Maximum Flow Capacity: 80 CFM @ 90 PSI

100M05A	Pressure Gauge

GUN REBUILD AND VALVE REPAIR KITS

Due to design upgrades in the Guardair product line, Guardair now offers repair and rebuild kits for both the new "Classic+" Series and the older "Classic" Series air guns.

At a Glance Identification: To identify your air gun please refer to the illustration below:

Classic+ Series

The new "Classic+" air guns can be identified by the lack of of "V" notch at the top of the air gun.

Classic Series

Older "Classic" air guns can be identified by the distinctive "V" notch at the top of the air gun.

	Part #	Description	For Guardair Model #'s	Items Included
Classic+ Series	74PK01	Standard Valve Repair Kit	74BH, 74H, 76S006, 80WJ, 80LJ, 75LJ, 79SG, 1500, 1510, 1548	Hex nut, o-ring, spring, seal, TRP01 trigger, valve stem assembly
	74PK03	Volume Adjust Valve Repair Kit	57S30XB, 74SK, 80, 79SGM, 79WG, 79WGD, 83SG	Flow control assy. with nut, o-ring, spring, seal, valve stem assembly
	75XTPK01	Xtra Thrust Valve Repair Kit	75XXT, 75XT	Hex nut, o-ring, spring, seal, TRP02 trigger, valve stem assembly
Classic Series	74K01	Valve Repair Kit	74BH006Z, 74H, 74S, 75LJ, 76S, 76S006, 79SG, 79SG012, 80LJ, 80WJ, 1400, 1448	Valve assembly, spring
	74K02	Gun Rebuild Kit	74BH006Z, 74H, 74S, 75LJ, 76S, 76S006, 79SG, 79SG012, 80LJ, 80WJ, 1400, 1448	Valve assembly, spring, hex nut, gasket, trigger, trigger rivet

	510K01	Shuttle Valve Maintenance Kit	HYD	Shuttle valve assembly, spring, o-ring, extraction tool

ACCESSORIES AND REPLACEMENT PARTS

MODEL 200A30 GUNSLINGER®

Magnetic Base Air Gun Holder

- Convenient and easy storage
- Keeps tools ready for instant use
- Works with all extension air guns
- Sturdy, high density polyethylene
- 190 lbs of combined holding force
- Magnets: 3-1/4" OD
- Tube: 12" length x 1-3/4" ID

MODEL 500A20 SIDEKICK®

Auxiliary Support Handle

- Fits all Guardair Long John, Xtra Thrust and Ultra Safety Air Guns
- Comfortable molded grip
- Provides extra stability and control

MODEL 84CNA WHISPER JET® NOZZLE

- Parts ejector and blow-off nozzle for punch presses and automatic machines
- Provides focused air stream for cooling and drying
- Reduces noise to levels 6-20 dBA less than conventional open air jets
- 1/4" NTP inlet
- Maximum operating pressure 150 psi
- To be used with 86FLX Series

Meets OSHA Standards

FOR SYPHON GUNS

	Part #	Description
79SGM		79SGMA08 1 qt. Metal Screw-on Canister
		79SGE006P 6" Rigid Extension
		79SGF012P 12" Flexible Extension
79SG012		79SGN13 Outer Nozzle
		79SGB06 Brass Sinker
		79SGB1208 12" Outer Barrel Extension

CUSTOM ANGLES

Need a specific angle for your extended reach air gun? Guardair can create angles to your specifications. Call us.

MODEL 86FLX FLEXTENSION

- Ideal for blowing, cooling and drying
- Adjustable to any position without wander or springback
- Reduces noise levels 6-20 dBA less than conventional open air jets
- 1/4" NPT inlet
- Maximum operating pressure 120 psi

Meets OSHA Standards

Part #	Description
86FLX012	Flextension, 12"
86FLX018	Flextension, 18"
86FLX024	Flextension, 24"

MODEL 350G SLIP-ON GRIP

- Soft plastic, thermal insulated, slip-on grip
- Extra comfort for frequent air gun users
- Fits all Guardair Classic+ air guns.

Part #	Description
350G01	1 Grip
350G02	Package of 12 Grips
