SOLID CARBIDE ULTRA TEAM TOOL
19 72
HUNTINGTON BEACH

Creating Value through Efficiency
by utilizing progressive Quality, Manufacturing,
Human Resource & Technological applications.

SmoothFlute
Patented Variable Helix design for robust stability in deep axial cuts

SmoothGrind®
Polished cutting surfaces for extreme sharpness and lubricity

SmoothCoat®
Sputter-based SuperNitride PVD coating for superior surface hardness & uniformity

SmoothContricity®
Precision grinding, tool holding, and tolerances for minimized TIR

SmoothEdge®
Surface and edge preparation for lubricity and minimized tool break-in

ULTRA-Grain®
The World's finest, purest sub-micron tungsten carbide powders

Laser etching for permanent tool identification

SFR
Tight tolerance shanks with superior roundness are shrink-fit ready

Tool Alliance®

Sales offices in Florida & California
Made in the USA for 45 years
Performance Guaranteed

Process control ID# on product label ensures total traceability

Next Day shipments on all pre-packaged Ultra-Tool products can be ordered until 6:00 PM EST.

Welcome to Ultra-Tool's Catalog Version 2020.

The diversity and selection of solid carbide cutting tools contained within this book is quite remarkable. A density of presentation allows us to display within 64 pages what others would use a multiple of that for.

There are few companies in the world offering such a comprehensive assortment. Countless fractional and metric sizes, rads, coatings, edge preps, carbide grades... the list goes on. And we stock and support it all.

Our product approach is actually quite simple; we select the finest materials one can purchase, engineer really great designs, use the best grinding methods, and apply the most advanced coatings available.

The result is a superb product at a great price. Rest assured the value contained within the package reflects a lean manufacturing and efficient operational culture, in contrast to the large, expensive, bureaucratic organizations and sales structures of our competitors.

Of particular interest, check out our expanded lineup of Monolith end mills. We now offer this incredible design in seven different geometries to meet demanding applications in almost any material.

At Ultra-Tool we take great pride in manufacturing solid carbide rotary cutting tools that our customers will want to use time and again. Our product is direct evidence of that. Please ask for it by name.

Sincerely,

David J. Povich
President

P.S. Make sure to try our other great Tool Alliance brands!

1 ULTRA-Grain® Components of Guaranteed Quality

COMPONENT #1: Carbide Substrate From being the first Company to introduce MicroGrain carbide to the mass-market round tool industry through the present day, Tool Alliance® has consistently innovated new powder and grade combinations for demanding applications. We recognize that our material is the very first Significant Characteristic. By creating partnerships with a limited number of tungsten powder and cemented-carbide material suppliers, we are able to guarantee that our customers receive precision-tolerance tools ground from only the purest, finest grades available worldwide. The following photographs of Ultra-Carb® 1 and Ultra-Grain® 1 respectively demonstrate the complexity of the compound we commonly refer to as Cemented Carbide. Taken at magnification of 10,000 X through an SEM (Scanning Electron Microscope), the visible grains are tungsten while the cobalt binder appears as dark shadows. The largest tungsten grains appearing in the Ultra-Carb photo are less than one micron in size. Note that these grades are two samples representing more than a dozen different substrates we use throughout our product lines, each having a particular application niche. Compared to other industry participants, you will find that Tool Alliance offers the best month-to-month and year-to-year consistency in carbide grain structure.

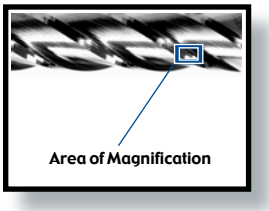
Ultra-Carb® 1
Cobalt Percentage: 6%
Grain Size (µm): ≤ 0.8
Hardness: 93.5 HRa
Fracture Toughness (K_{1c}): 6.6
TRS (GPa): 3.8
Density (gm/cc): 14.90

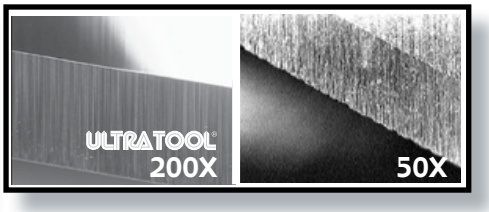
ULTRA-Carb®

Ultra-Grain® 1
Cobalt Percentage: 10%
Grain Size (µm): ≤ 0.7
Hardness: 92.7 HRa
Fracture Toughness (K_{1c}): 7.9
TRS (GPa): 4.1
Density (gm/cc): 14.30

ULTRA-Grain®

2 SmoothGrind®





SmoothGrind® Competitor's

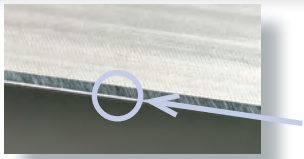
COMPONENT #2: The Grinding Process After selecting the best material available, Tool Alliance has perfected the manufacturing technology to optimize 100% of its physical properties. We call this process SmoothGrind®. Years in development, SmoothGrind is the result of a proprietary combination of material, abrasive, coolant, machine-tool, software, and grinding method technologies that produce cutting tools with superior qualitative characteristics. Sharper and longer lasting cutting edges, enhanced work piece finishes, and much improved lubricity are just some of the benefits brought to you by the latest solid carbide rotary tooling advances from Tool Alliance. The two photos above display an Ultra-Tool end mill primary relief featuring SmoothGrind (left) versus a major competitor's product (right). To fully demonstrate the difference, the Ultra end mill is shown at double the magnification. Note the straight line of our end mill's primary relief in comparison to the jagged edge of the competing product. Keep in mind the competitive end mill is a very good product that has a large following, yet the difference is substantial.

3 SmoothContricity®

SFR
Shrink Fit Ready

COMPONENT #3: The Tooling Process All the best physical ingredients are wasted unless they are all pulled together in a comprehensive system that maximizes their respective attributes. Tool Alliance calls this process SmoothContricity®. Our customer base represents the leading edge of machine tool utilization, and SmoothContricity ensures that optimum results can be obtained in a variety of ways; minimized run-out (TIR), industry-leading tolerances on diameter & radius, and 100% Shrink Fit Ready (SFR) shanks. Combined, these attributes allow our consumers to reach full machining potential and position the cutting tool as a systematic contributor to process consistency and repeatability.

4 SmoothEdge®



.0001 SmoothEdge atop cylindrical margin atop primary relief.

SE

COMPONENT #4: The Edge Preparation Process
Our cutting edges are literally too sharp for certain materials. For our carbide inserts and now increasingly for our solid carbide round tools, proper edge preparation can yield huge productivity improvements to "out of the box" tool application. Using a treatment we call SmoothEdge® and performed on machine tools developed in our own R&D lab, we've taken the mystery out of tool "break-in" and provided a consistency that can be counted on time and again. The processes range from a microblasting treatment using extremely fine aluminum oxide powder to a diamond-lapping compound to brushes. All are application-specific to sound and run smooth from the first cut and protect your tooling investment from unnecessary potential for chipping during your initial tooling paths. Big productivity gains can be achieved in certain applications as well due to improved chip formation and evacuation. Learn more about SmoothEdge on Page #55.

Our coating @ 2,000X (top).
Everybody else's (bottom).

SmoothCoat® 5

COMPONENT #5: The Coating Process The challenge of finding a coating method to leverage 100% of the inherent assets of our carbide grade and grinding technologies was difficult. What we finally discovered was such a perfect fit and so logical for our product lines that we invested heavily into the process we now call SmoothCoat®. Much more than simply the standard arc-deposited PVD coating, SmoothCoat involves sputter multi-layering and a multi-step prep & post operation called Micro-Blasting. The advantages of this procedure include relieving of tensile stresses underneath the cutting edge, increased stability of the coating surface, and perhaps most importantly, elevating SmoothGrind even another notch by leveling and activating the cemented carbide substrate. The result is a smooth, shiny, tough, and durable surface that can withstand tomorrow's machining requirements and outlast competitive coatings. Additionally, we've made it a standard feature on thousands of our standard catalog items. Our coating services are performed within our own factories for quality & extremely quick turnaround times.

Coating Availability Order by adding the suffix TA, TN, AT, TC, A1, D1, or D2 to the EDP #.

Patented SmoothFlute Series 323 Variable Helix End Mills by ULTRATOOL®

33° RHS VARIABLE HELIX

Series 323 Patented SmoothFlute® Four Flute Variable Helix End Mill Square, Corner Radius & Ball

Slot up to 150% x diameter: The Ultra-Tool® Series 323 is a revolutionary solid carbide end mill featuring our patented SmoothFlute® geometric design that can rough & finish at incredible speeds and feeds. SmoothFlute + SmoothEdge technology provides extended tool life and excellent work piece finishes by increasing stability and edge integrity. Series 323 is precision ground from Ultra-Grain®1, a premium carbide substrate that couples high hardness with excellent chipping resistance. Choose from Square, Ball, or 7 different standard radii for your roughing or finishing requirements. Includes AT (AlTiN) coating.

new! Additional Lengths and Radius sizes throughout the range!

The 323 & 365 are designed for maximizing Axial Depth of Cut, and optimizes geometry when used at approximately 75% LOC.

This product is manufactured under U.S. Patent No. 7,284,935. Please see high-performance Speeds & Feeds on page #58.

Slot Milling | Pocket Milling | Peripheral Milling

Metric Sizes: The Ultra-Tool® Series 323 is also available in a limited range of metric sizes, each provided with a popular sized radius. Please see catalog page #16.

SmoothFlute

SmoothFlute® is the latest technology to be integrated within our product line. It's so unique and important that we've not only obtained patent protection in the USA but additionally in all the major industrial countries of the World.

As incorporated into the Series 323, 323ML, 365, 365ML, and 395ML end mills, SmoothFlute allows for outstanding feed rates with incredibly quiet harmonics. The resultant stable and smooth cutting action leads to superb edge integrity for longer lasting tool life and enhanced work piece finishes.

Should you need a diameter, LOC, radius, or other characteristic not offered in our standard product line, SmoothFlute is also available for special tools on our tungstentoolworks.com website.

ULTRATOOL® Patented SmoothFlute Series 323 Monolith™ Series End Mills

Monolith end mills by Ultra-Tool represent a culmination of decades of experience and craftmanship in solid carbide grinding. Extended reach applications are notoriously difficult, but each respective Monolith Series combines the best of SmoothGrind, SmoothContricity, SmoothEdge and SmoothCoat to maximize success. The 323ML holds size and concentricity to a maximum of .0003 deviation, even at a 12" reach! All Monoliths feature SmoothEdge with standard AT hardcoating.

About the Monolith configuration: Ultra-Tool® has taken the very best of all our technologies and consolidated them within our Monolith end mills. Ultra-Grain, patented and/or unique designs, SmoothGrind, SmoothContricity, SmoothEdge, SmoothFlute and SmoothCoat are all incorporated into a behemoth which showcases the attributes necessary for successful machining in challenging applications. Special blank prep procedures and toolholding guarantee incredible concentricity characteristics. The Monolith is now available within the 323, 365, 355, 395, 330AL, and 333AL Series (designated with the "ML" suffix). These are superb products; you'll find nothing else like them in the industry!

Please use heat-shrink holding for best results.

new! Standard Radius sizes throughout the range!

Metric Sizes: The Ultra-Tool® Series 365 is also available in a limited range of metric sizes, each provided with a popular sized radius. Please see catalog page #16.

The patented 365 Monolith™ end mill, Flagship of the industry.

100% American Designed American Made American Owned

High Efficiency Milling (HEM) ratio

ULTRATOOL® Patented SmoothFlute Series 365 Monolith™ Series End Mills

Monolith end mills by Ultra-Tool represent a culmination of decades of experience and craftmanship in solid carbide grinding. Extended reach applications are notoriously difficult, but each respective Monolith Series combines the best of SmoothGrind, SmoothContricity, SmoothEdge and SmoothCoat to maximize success. The 365ML holds size and concentricity to a maximum of .0003 deviation, even at a 12" reach! All Moloiths feature SmoothEdge with standard AT hardcoating.

Series 365ML MONOLITH™

Solid Carbide Extended Reach End Mill
• Six Flute • AT Coated • Tight Tolerance • Minimal TIR • Clearance Neck • Corner Radius • Variable Helix

This product is manufactured under U.S. Patent No. 7,284,935

About the Monolith configuration: Ultra-Tool® has taken the very best of all our technologies and consolidated them within our Monolith end mills. Ultra-Grain, patented and/or unique designs, SmoothGrind, SmoothContricity, SmoothEdge, SmoothFlute and SmoothCoat are all incorporated into a behemoth which showcases the attributes necessary for successful machining in challenging applications. Special blank prep procedures and toolholding guarantee incredible concentricity characteristics. The Monolith is now available within the 323, 365, 355, 395, 330AL, and 333AL Series (designated with the "ML" suffix). These are superb products; you'll find nothing else like them in the industry!

Please use heat-shrink holding for best results.

ULTRA-Grain® + SmoothGrind® + SmoothContricity® + SmoothEdge® + SmoothCoat®

SmoothFlute

Our patented SmoothFlute is included on the 323, 323ML, 365, 365ML, and 395ML

ULTRATOOL® Series 355 and 377 Series End Mills

Series 355

Ultra-Grain® Carbide End Mill
• Five Flute • 45 Degree RH Spiral
• SmoothEdge Honed • Coated

The Ultra-Tool® Series 355 End Mill is designed for the highest efficiency in the milling / finishing of steel, stainless, titanium and high temp alloys. Precision ground from Ultra-Grain®1 for top strength, the 355 features a proprietary OD hone to minimize tool break-in and the latest generation of SmoothCoat® AlTiN PVD coating. S&F's on page #58.

ULTRATOOL® Solid Carbide Roughing End Mills for Steels & Exotics

Series 395
Sinusoidal Roughing End Mill
30 Degree RH Spiral • Four Flutes

The Ultra-Tool® Rougher Series 395 is a true roughing end mill featuring sinusoidal geometry & radial relief for optimal strength. Designed & engineered for maximum stock removal at very high operating speeds, the 395 is specifically targeted for medium to high tensile steels, stainless, and related high-temperature alloys. Cutting 45° corner chamfer is standard. Coated price includes your choice of TiCN, TiN, AlTiN, or TiAlN.

ULTRATOOL® Three Flute High Helix End Mill

Series 320-60S
Three Flute • High 60 Degree RHS Helix

The high-helix design is ideal for all peripheral milling applications. In light depths of cut this tool can be used for all materials from aluminum to exotic alloys. The 60° helix will provide an excellent surface finish and reduce cutting loads.

Ultra-Tool® products are Shrink Fit Ready (SFR).

ULTRATOOL® Monolith™ Series End Mills for Aluminum

Monolith end mills by Ultra-Tool represent a culmination of decades of experience and craftmanship in solid carbide grinding. Extended reach applications are notoriously difficult, but each respective Monolith Series combines the best of SmoothGrind, SmoothContricity, SmoothEdge and SmoothCoat to maximize success. The 330ML and 333ML hold size & concentricity to a max of .0003 deviation, even at a 12" reach! All AL Monoliths feature SE8, with optional TC or A1 hardcoating.

Series 330ML

Solid Carbide Ext. Reach End Mill for Aluminum

- Two Flutes • Tight Tolerance • Minimal TIR
- Available in Square or Ball End
- Standard Clearance Neck

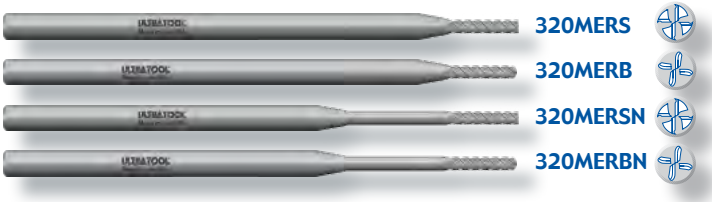
ULTRATOOL® Micro Extended Reach Four Flute End Mills

Leading off our incredible selection of micro tools are the 3" long, 4 flute 320 Micro Extended Reach Square (320MERS) and Ball (320MERB) end mills. Available UnCoated and with 3 different coatings (AT, D1 PVD Diamond, or D2 CVD Diamond) plus an optional clearance neck, these end mills are ideal for applications where precision and reach are important. Diameter tolerance ± .0003 (except for D2 Diamond +.0005/−.001). 1/8" shank. Add "N" for extended clearance neck.

Series 320MERS & 320MERB

Solid Carbide Micro Extended Reach End Mill
Four Flutes • Tight Tolerance • LOC = 5X diameter
Square or Ball End • 3" OAL • 1/8" shank
Standard Clearance Neck with "N" selection

For coating selection add AT, D1, or D2 suffix to EDP#.



SFR 35% tighter shank tolerance than h6!
Shrink-Fit Ready!

Solid Carbide Micro End Mills by ULTRATOOL®

The **Ultra-Tool®** selection of micro solid carbide end mills is unmatched in quality and range. Three different length of cut (LOC) to diameter ratios (**M**icro = 1.5X, **M**icro **L**ong = 3.0X, & **M**icro e**X**tra **L**ong = 5.0X), two & four flute, square & ball nose, plus coated & UnCoated. Square & Ball prices are identical. These tools match great carbide substrate with superb characteristics. 1/8" shank diameter x 1.5" OAL (metric sizes=3.0 x 38mm).

Specs (micro end mills cutting diameter < 1/8"):
Cutting Diam +.0003 / -.0003
Shank Diam +.0000 / -.0002
Radius ± .00015
SFR = Shrink Fit Ready

Specs (MM micro end mills cutting diameter < 3.0mm):
Cutting Diam +0.008 / -0.008mm
Shank Diam +0.000 / -0.005mm
Radius ± 0.004mm
SFR = Shrink Fit Ready

35% tighter shank tolerance than h6!

Micro End Mills have a 1/8" (3.0mm for metric) shank diameter.

UC TA TN TC

In addition to UnCoated (UC) our micro end mills are available with these standard coatings.

Fractional Corner Radius End Mills by ULTRATOOL®

The Ultra-Tool® Series 330R, 362R, and 320R are tough workhorses with Radii that can handle the vast majority of demanding applications. These tools are precision ground from Ultra-Grain®, a premium carbide substrate that couples high hardness with excellent chipping resistance. Choose from 8 different standard radii for your roughing or finishing requirements. Crank up the feed rates even more by adding one of our in-house SmoothCoat® PVD hardcoatings, and / or add SmoothEdge® to eliminate tool break-in. Note the new LOC's and OAL's on the 320R Series!

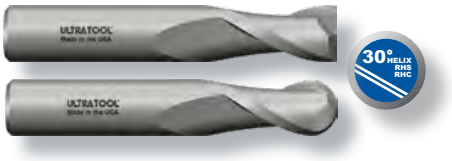
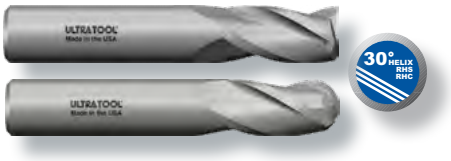
Single End Standard Length End Mills by ULTRATOOL®

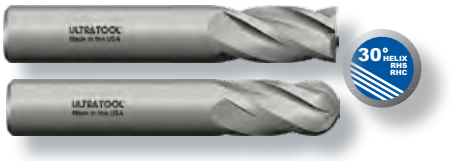
Series 330S Square End
330B Ball End • Two Flute



Series 362S Square End
362B Ball End • Three Flute



Series 320S Square End
320B Ball End • Four Flute



The **Ultra-Tool®** Series 330, 362, and 320 represents the industry's best value in a general purpose design. These end mills are more than capable of handling 75% of milling applications due to robust geometry, quality craftsmanship, and best-in-class carbide substrate. Most importantly, the Series 330, 362, and 320 all benefit from the Tool Alliance® duo of proprietary & value-added features: SmoothGrind® & SmoothContricity®, with SmoothCoat® and SmoothEdge® available individually for an extra charge. Additionally, special radii and clearance necks can quickly be added to any size.

Detailed Speeds and Feeds instructions can be located on Page #59.

Standard features:
SmoothGrind® SmoothContricity®
Available options:
SmoothCoat® SmoothEdge®

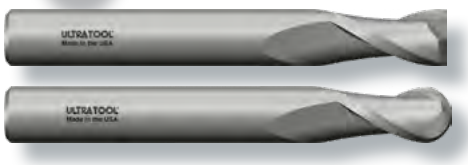
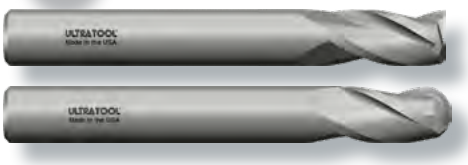
Long & Extra Long End Mills by ULTRATOOL®

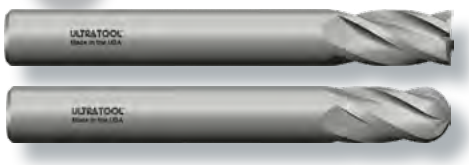
Series 382S Square End
382B Ball End • Two Flute



Series 383S Square End
383B Ball End • Three Flute



Series 384S Square End
384B Ball End • Four Flute



The **Ultra-Tool®** Series 382, 383, and 384 represents the industry's best value in a extended length or extended reach design. These end mills are more than capable of handling 75% of milling applications due to robust geometry, quality craftsmanship, and best-in-class carbide substrate. Most importantly, the Series 382, 383, and 384 all benefit from the Tool Alliance® duo of proprietary & value-added features: SmoothGrind® & SmoothContricity®, with SmoothCoat® and SmoothEdge® available individually for an extra charge. Additionally, special radii and clearance necks can be quickly added to any size.

Detailed Speeds and Feeds instructions can be located on Page #59.

Standard features:
SmoothGrind® SmoothContricity®
Available options:
SmoothCoat® SmoothEdge®

ULTRA-Grain®

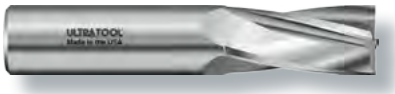
Slow Helix Upcut and Downcut Solid Carbide End Mills by ULTRATOOL®

Series 321S Square End
Four Flute • Slow Helix
Upcut Milling • Standard Length



Ultra's new Series 321 Slow Helix end mill is designed for materials that tear or shred when milling with a standard higher helix design, like composites and CFRP's. Accordingly, we offer this end mill with application specific coatings that are ideal for extending life in these abrasive materials.

Series 329S Square End
Four Flute • Left Hand Helix / RHC
Downcut Milling • Standard Length

Ultra's new Series 329 is for apps where the work piece needs to be "pushed down" during milling via a left hand spiral / right hand cut downcut design. Again, for composite materials and CFRP's, we've provided the ideal SmoothCoat options to extend tool life.

Ultra's D1 PVD Diamond coating is the perfect compliment for routing abrasive materials with our 220 Series. The smoothness of our sputter based process helps evacuate the material up and out of the cut with superb lubricity. The hardness of D1's multi-layered surface lends outstanding wear characteristics when routing in the types of material for which the Series is designed. Add D1 as a suffix to the EDP #.

These routers are designed for compression routing of a wide range of materials. Our polished SmoothGrind cutting edges shears the work piece with a super sharp primary relief. Use our thin, smooth, and hard D1 PVD diamond for plastics, woods, composites, CFRP's, honeycombs, and other abrasive materials. Use our hard & thick D2 CVD diamond for long-running jobs in the same materials.

*Two-piece brazed construction; solid-carbide head w/steel shank.

Counterbores by ULTRATOOL®

Series 232S
Solid Carbide Counterbores
Square Flat Bottom • 4 Slow Helix RHS Flutes • Center Cutting

These true counterbores have a cylindrical, non-cutting OD margin, center cutting flat bottom, and incredible OD tolerance of +.0000 / -.0003 (before coating). Use the 232S to spot face irregular surfaces, counter bore, mill a flat bottom, or straighten a misaligned hole. Available in all standard SmoothCoat's.

SmoothFlute

SmoothFlute® is the latest technology to be integrated within our product line. It's so unique and important that we've not only obtained patent protection in the USA but additionally in all the major industrial countries of the World.

As incorporated into the Series 323, 323ML, 365, 365ML, and 395ML end mills, SmoothFlute allows for outstanding feed rates with incredibly quiet harmonics. The resultant stable and smooth cutting action leads to superb edge integrity for longer lasting tool life and enhanced work piece finishes.

Should you need a diameter, LOC, radius, or other characteristic not offered in our standard product line, SmoothFlute is also available for special tools on our tungstentoolworks.com website.

Japanese Patent issued for SmoothFlute® technology.

ULTRATOOL® Carbide Countersinks

ULTRA-Grain®

Series 910
Carbide Six Flute Countersinks
For use in hardened materials

*Set 910 consists of 1/4, 3/8, 1/2, 5/8, and 3/4" sizes in a custom-made, reusable steel index.

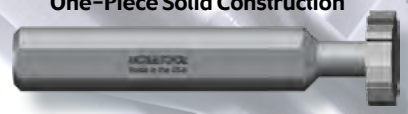
Solid Carbide ULTRATOOL® Keyseat Cutters

Series 610
Carbide Keyseat Cutters
One-Piece Solid Construction



Ultra's Series 610 Keyseat Cutter is all solid, all the time. Not only is there no braze joint to fail, but we use a premium carbide grade with superb Transverse Rupture Strength to mitigate breakage. Utilizing our Express Service, we offer special face widths, radii, extended necks, reduced shanks and more with extremely quick turnaround times. Plus, the Series 610 is now available with any of our SmoothCoat standard coatings at one low price.

FLAT

Shank Diameter= 1/2" (12.7mm)
Neck length = 1/4" (6.3mm)

Solid Carbide Saws by ULTRATOOL®

Ordering our Series 620 Solid Carbide Saws has never been easier. Size ranges and quantity breaks have been consolidated; simply note the semi-blank EDP# for the diameter of your need and specify the decimal thickness. Pricing inclusive of our in-house SmoothCoat® PVD hardcoating is also listed. All Ultra-Tool® saws are manufactured in our factories featuring 100% CNC generated fluting and relief angles. Available via Ultra's Express Service for fast delivery. Alterations for radii, chamfers, hubs, and angles also available. Special sizes, thicknesses, ID's, keyways, etc. are available upon quotation request.

ULTRATOOL® Standard Length Solid Carbide Reamers

Series 410
Standard Length • Straight Flute • RH Cut

Series 410R
Standard Length • RH Spiral • RH Cut

Series 410L
Standard Length • LH Spiral • RH Cut

Now it's easier than ever to purchase the Ultra-Tool® line of precision carbide reamers (featuring the industry's tightest tolerances). We've eliminated all quantity breaks and published one low price. Best of all, finished UnCoated reamers are available to ship via Ultra Express Service as quick as the following business day. We've even added a pricing column for SmoothCoat TA, our most versatile TiAlN coating. Performed in-house, TA will add only 1 business day to delivery and includes SmoothEdge 1 edge prep.

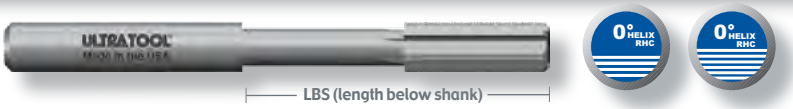
Solid Carbide Economy Reamers by ULTRATOOL®

Series 411 • Decimal Sizes
Economy Reamers • Straight Flute • RH Cut
Oversized Shanks with Neck Clearance



The 411 Series is ground from an oversized, common shank diameter to offer superb reaming capabilities at a lower price point than typical "reduced shank" type reamers ground between centers. Solid carbide construction. Available with TA coating. Flute length equals one-half length of reach.

TA

Now it's easier than ever to purchase the Ultra-Tool® line of precision carbide reamers (featuring the industry's tightest tolerances). We've eliminated all quantity breaks and published one low price. Best of all, finished UnCoated reamers are available to ship via Ultra Express Service as quick as the following business day. We've even added a pricing column for SmoothCoat TA, our most versatile TiAlN coating. Performed in-house, TA will add only 1 business day to delivery and includes SmoothEdge 1 edge prep.

*Solid Carbide construction on these sizes only; All 453, 453R, & 453L Series feature female-centers on both ends.

ULTRATOOL® Extra-Long Small Diameter Solid Carbide Reamers

The Ultra-Tool® Series 453XL is a 6" overall extra-long reamer. Precision ground with 6 straight flutes, the 453XL allows increased reach and tight tolerances on smaller hole diameters. Available with TA coating.

ULTRATOOL® Spotting Drills

Series 525
Short Length • 25° RH Helix
82° • 90° • 120° • 140° • 150° included angles
Four Facet Point • Constant Web • No OD Clearance • Produces True Centers

new! **Additional sizes and included angles!**

Now Ultra-Tool offers 5 different angles of dedicated spotting drills. For true spot drilling, use a 525 with an angle slightly larger than the following finishing drill. The 525 Series can also be used for countersinking and is typically faster than traditional center drilling applications.

Combined Drill & Countersink Center Drills by ULTRATOOL®

Series 560
Combined Drill & Countersink
Double End • 60°/ 82°/ 90° Incl. Angle • RH Cut

The solid carbide Ultra-Tool® Series 560 Combined Drill & Countersink is the high-productivity alternative to equivalent HSS centerdrilling designs, featuring a slight helix for great chip evacuation. Available in 3 different angles.

Ultra's D1 PVD Diamond coating is the perfect compliment for drilling abrasive and soft materials with our special brad style point. The smoothness of our sputter based process helps evacuate the material up and out of the hole with superb lubricity. The hardness of D1's multi-layered surface lends outstanding wear characteristics when making holes in the types of material for which the brad point is designed. Add D1 as a suffix to the EDP #.

Our manufacturing system is designed to give our customers consistency in product from order to order, and application to application.

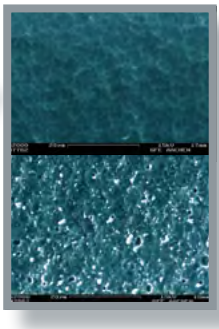
Coating Spotlight • SmoothCoat TA

Ultra's TiAlN coating is the all-around workhorse of our SmoothCoat selections. First, a brief word regarding the two types of PVD coating, "sputter" and "arc." SmoothCoat is a sputter-based process and, unlike arc, the materials to be deposited on the tools are not melted down, but rather transferred directly from a solid to a gaseous state. This means that zero "droplets" (bead-shaped macro particals) form on the tool surface, leading to the smoothest surface possible. Why doesn't everyone use sputter technology? The answer is it takes longer (i.e. more expense, and toll coaters can't do as many loads in a day).

Classified as a Supernitride type of PVD, our TA nanocomposite coating has low residual stress which provides excellent adhesion and stability. Even with thickness of 3-4 microns, sharpness is retained on the cutting edge with corresponding low friction at the work piece material level. This true performance coating can withstand application temperatures of 1000°C, has a microhardness of over 3500HV, and can be used wet or dry over a wide variety of applications and materials. SmoothCoat TA is available standard on thousands of items in this catalog... try it today!

'SECRET MENU' ITEM: TA is so smooth with such great adhesion and low stress levels that we can effectively "double-up" the thickness level to 6-8 microns! We call this "A2" and use it in special applications, primarily within our Mil-Tec indexable carbide product line. However, with our SmoothGrind so sharp and our sputter technology so precise on layering the underlying tool, we can retain an amazingly precise cutting edge feature. Consider A2 in heavy wear apps and roughing cuts where chip load per tooth is maximized. Ask your inside sales rep for it by name.

SmoothCoat®



Our coating magnified to 2,000X (top). Everybody else's (bottom).
Our sputter technology has no droplets and features a smooth, clean surface.

Tool Alliance®: Ready, Set, Cut!™

About the brands of Tool Alliance® For more info contact sales@toolalliance.com

We obsess over details that create the finest cutting tools available. Our reward is customer satisfaction via increased factory productivity. We cannot be the best without thinking differently, so over a 45 year operating history we've developed proprietary technologies and brands that yield significant characteristics and designs of cutting tools unlike any you'll find elsewhere:

TUNGSTEN TOOLWORKS.COM

The world's first web-based design, blueprint, quotation, and ordering system for solid carbide specials brings real time information to cutting tool consumers everywhere on a 24/7/365 virtual basis.

Customize Yourself.™

tungstentoolworks.com

ULTRATOOL®

Celebrating 45 years of providing the industry's highest value in solid carbide standards and blueprint specials.

The Total Value Carbide Solution.™

ultra-tool.com

MIL-TEC®

Precision ground and polished carbide insert geometries utilized within a family of advanced end mill & face mill cutter bodies.

Reprogram your milling expectations.™

miltecusa.com

RoundTool® LABORATORIES

High-performance solid carbide round tools for die & mold, medical, consumer electronic, aerospace, composite, and micro machining.

Not just where machining is, but where machining will be.™

roundtool.com

routco

Bringing the Tool Alliance principles of Performance & Value to the woodworking and plastics industry.

Proven daily by the linear foot.™

About the technology partners of Tool Alliance®

Our technology partners are second to none. We find premier firms, the technological leaders in their respective industries, throughout the world and work with them in progressive, win-win relationships to bring our customers the very finest components and characteristics that we build into our products. Constant reinvestment into our company-owned factory buildings and equipment base promise long-term stability & consistency in delivering Performance & Solutions to carbide rotary tooling consumers everywhere.

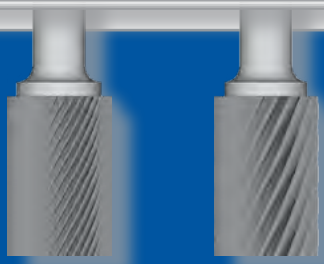
ULTRATOOL® Carbide Rotary Files (Burrs)

Cut Style #1

Standard Cut is a general purpose style designed for cast iron, steel, other ferrous materials. It will achieve very high material removal rates and good workpiece finishes. The second most popular style after Dura-Cut.

☆ Stocked Inventory



#2

Fine Cut improves finishes on hardened steel, stainless steel, and cast iron. Operator control is improved. The excellent finish, however, comes with reduced stock removal rates.

#3

Coarse Cut is recommended for use on soft material such as copper, brass, aluminum, plastics, and rubber, where chip loading is a problem, and the rapid stock removal rates of Fast-Mill is not practical.

Available by Special Order

#4

Dura-Cut allows for rapid stock removal in harder materials. The addition of left hand flutes reduces the pulling action, allowing better operator control. It reduces the size of the chips and can be used at slower than normal speeds.

☆ Stocked Inventory

#5

Coarse-Dura Cut is for fast stock removal in soft materials, with improved operator control over Coarse Cut. The addition of the left-hand Dura also reduces chip size.

#6

Fine-Dura Cut is very effective in heat treated and tough alloy steels. The Dura addition reduces the size of the chips and offers excellent operator control and surface finish.

#8

Diamond Cut is very effective in heat treated and tough alloy steels, making extremely small, powder-like chips. It offers very good operator control and stock removal at the sacrifice of some finish and tool life characteristics.

Available by Special Order

new! TA

Only Ultra-Tool® offers a full range of cut styles for your specific application needs. Primary stocking styles are #1 Standard and #4 Dura-Cut; other styles available upon quotation / POA. All styles are precision CNC ground to the best quality standards for a truly high-end product. Now available with TA coating as standard.

ULTRATOOL® BURRS & SETS ALSO AVAILABLE IN METRIC CONFIGURATION:
Furnished on 6mm or 3mm shanks. Add 70000 to displayed EDP# (#04001 becomes #74001). Add "M" to Style description (SA-5 becomes MSA-5). Two-piece construction burrs retain fractional head diameters & LOC.

OAL Information for Series 40 thru 53: All burrs with body diameter of greater than 1/4" have Ultra-Carb heads brazed to a 1.75" or 2" hardened steel shank with a 1/4" or 6mm diameter unless otherwise noted. All burrs with a body diameter of 1/4" or less are manufactured from solid Ultra-Carb and are 2-inch (51mm) overall length.

ULTRATOOL® Fast Mill Non-Ferrous Cut Carbide Rotary Files (Burrs)

Cut #7 Non-Ferrous Cut Style • 1/4" Shank

For Metric sizing, add 70000 to displayed EDP#; shank diameter = 6.0mm.

Fast-Mill is designed specifically for use on non-ferrous and non-metal materials. Designed for rapid stock removal with minimum chip load. The best selection for rapid removal of aluminum. These tools more resemble form tools than traditional burrs; each is CNC ground with with high precision, tight tolerances, and superb surface finishes.

TC

Our #7 Fast Mill non-ferrous cut is available with TC (or A1 upon request) coating.

Burr Specifications:
Shank Diameter 1/4"
Add "M" for 6mm shank

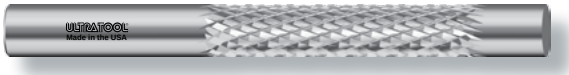
Solid Carbide ULTRATOOL® Piloted Die Trimmers

new!

Series 341

Solid Carbide Piloted Die Trimmers
Double "Dura-Cut" Style • Right Hand Cut • Non-Cutting Pilot



These die trimming burrs have a cylindrical, non-cutting pilot with OD tolerance of +.0000 / -.0003 (before coating) to prevent scoring of the die beyond the intended work area. The double Dura-Cut style allows for easy operator control and rapid material removal. Available UnCoated (UC) or with TA SmoothCoat.

Series 650 Tech Information

Ultra-Tool's Series 650 Polished Ground Carbide Cylinders feature the same world-class tungsten carbide substrate we use in all our finished cutting tools. Ultra-Grain has an excellent combination of high hardness & transverse rupture strength. Additionally, although cemented carbides typically feature poor corrosion resistance, our Series 650 offers industry leading specifications for this characteristic as well. These cylinders, like all Ultra-Tool solid carbide products, are Shrink-Fit Ready (SFR).

ULTRA-Grain®

Ultra-Grain® 1
Cobalt Percentage: 10%
Grain Size (µm): ≤ 0.7
Hardness: 92.7 HRa, 1680 HV
Fracture Toughness (K_{1C}): 7.9
TRS (GPa): 4.1
Density (gm/cc): 14.30

SFR Ground Cyl Specs (Metric): Diameter +0.000/-0.007mm OAL ±1.52mm

SFR Ground Cylinder Specs: Diameter +.0000/-.0003 OAL ±.060

Diameter tolerance is .0005 on lengths of 6" and longer. Lengths of 12" (305 mm) are uncut and will have greater OAL plus + tolerance. Series 650 may have chamfer on one end dependent upon size.

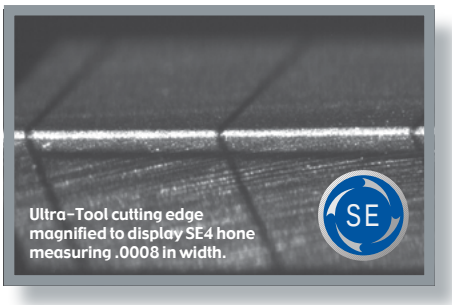
ULTRATOOL® Technical Data

SmoothEdge®

Our newest technology can achieve incredible productivity increases in specific applications. Many of our new Series include SmoothEdge as a standard feature, while on others it can be added as a same day post treatment for a small charge. Ask your Inside Sales representative about SmoothEdge today!

The Edge Preparation Process

Our cutting edges are literally too sharp for certain materials. For our carbide inserts and now increasingly for our solid carbide round tools, proper edge preparation can yield huge productivity improvements to "out of the box" tool application. Using a process we call **SmoothEdge®** and performed on machine tools developed in our own R&D lab, we've taken the mystery out of tool "break-in" and provided a consistency that can be counted on time and again. All five types of **SmoothEdge** will yield different benefits dependent upon application. **SmoothEdge** will make your tools sound and run smooth from the first cut and protect your tooling investment from unnecessary potential for chipping during initial tool paths.



Ultra-Tool cutting edge magnified to display SE4 hone measuring .0008 in width.

Combine SmoothEdge with our other value added features to design the ultimate cutting solution.

Primary SmoothCoat recommendations:

A1 for SE2 | TA for SE4 | AT for SE5

SmoothEdge 1

A microblasting treatment using extremely fine aluminum oxide powder to smooth the carbide surface while generating a very light edge preparation. This feature comes standard with any SmoothCoat® coating.

Uses: Highly recommended for most milling and drilling applications.

SmoothEdge 2

A lapping treatment to create extreme lubricity & smoothness with minimal edge prep on uncoated tools.

Uses: Highly recommended for milling and drilling of aluminum and other non-ferrous applications using UnCoated, A1, or TC coated tools.

SmoothEdge 3

Combines microblasting and lapping for a light hone with extreme lubricity.

Uses: Highly recommended for a wide range of general purpose machining applications using coated tools.

SmoothEdge 4

Adds a proprietary hone to the blasting and lapping cycles for a medium edge prep with excellent lubricity.

Uses: Highly recommended for milling and drilling applications involving general steels, stainless, and cast iron.

SmoothEdge 5

Doubles the honing and lapping cycle for maximum edge strength; a robust edge preparation combined with excellent lubricity characteristics.

Uses: Highly recommended for milling and drilling applications involving stainless, high-temp alloys, and exotics.

ULTRATOOL® Technical Data

With so many variables present in the machining process, it is essential to optimize every possible factor to achieve world-class efficiency. Your choice of a genuine Ultra-Tool® Solid Carbide product is an excellent first step in the process. Ultra-Tool® Solid Carbide products are high-performance tools that will perform best in a machining environment characterized by rigid fixturing and minimal spindle runout. Attention to proper speed and feed will eliminate vibration, chatter, and overheating as well as extending tool life. Generally speaking, the peripheral speed of solid carbide tools will vary with the hardness of the material being cut. The harder the material, the slower the speed. High speed and insufficient feed will cause work surface glazing and poor tool life. Chipping of cutting edges is an indication of chatter which can be caused by too high of speed, too light of cut, or improper support of the tool or workpiece. Handling is also very important; sharpened cutting edges should never be allowed to come into contact with any hard object (or another tool) in a non-machining environment as they will chip easily. Keep your Ultra-Tool® products in their original protective packaging until ready for use.

The guidelines on the following pages are generalities designed to demonstrate the operating window within which you may experience the best results. The charts and information provided should prove valuable in longer tool life with greatly reduced operational costs. This information is for uncoated product: SmoothCoat products will have significantly higher speed and feed rates. For more information contact an Ultra-Tool® Factory Engineer, Sales Manager or consult our websites at **ultra-tool.com** and **toolalliance.com**. eMails can be sent to **technical@toolalliance.com**.

Ultra-Tool International, Inc. is constantly striving to improve its processes, specifications, and tolerances. As such, products are subject to change without prior notice.

WARNING: Grinding or other use of this tool may produce hazardous dust and fumes which may endanger health. Grinding or modification should be done by professionals only. To avoid adverse health effects, read the material safety data sheet for this product. Utilize adequate ventilation and appropriate protection. Cutting tools may shatter when broken; eye protection in vicinity of use is strongly advised. MSDS available at www.ultra-tool.com.

Commonly Used Formulas:

Surface Feet Minute (SFM)=RPM x Diam. x .262
Revolutions Per Minute (RPM)=3.82 x (SFM / Diam.)
Feed Rate (IPM)=IPT x #teeth x RPM
Drilling (IPM)=IPR x RPM
Feed Per Tooth (IPT)=IPM / (#teeth x RPM)
Convert Inches to millimeters: Multiply by 25.4
Convert millimeters to Inches: Multiply by .03937

Trouble Shooting for Ultra-Tool® Carbide End Mills

Problem	Cause	Solution
Chipping	• Feed rate too high • Up milling (conventional) • Cutting edge too sharp • Chattering • Loose tool • Workpiece rigidity • Tool rigidity • Low cutting speed • Loose toolholder	• Reduce feed rate • Change to down milling (climb) • Hone cutting edge or allow break-in • Reduce RPM • Remove, clean, and retighten • Tighten workpiece holding method • Shorten LOC, place shank further up holder • Increase RPM • Remove from spindle, clean and replace
Wear	• High cutting speed • Low feed rate • Up milling (conventional) • Hard material • Poor chip evacuation • Improper cutter helix • Poor coolant	• Reduce RPM • Increase feed rate • Change to down milling (climb) • Use coated tool • Reposition coolant lines, use air blasting • Change to recommended helix angle • Replace coolant or correct mixture
Breakage	• Feed rate too high • Depth of cut too large • Poor tool rigidity • Tool wear • Poor chip evacuation	• Reduce feed rate • Reduce depth of cut • Shorten LOC, place shank further up holder • Replace/regrind sooner • Reposition coolant lines, use air blasting
Chattering	• Speed and feed too high • Poor toolholder rigidity • Poor spindle rigidity • Workpiece rigidity • Relief angle too high • Depth of cut too large • Poor tool rigidity	• Reduce feed rate • Replace with shorter/more rigid holder • Use larger spindle or different machine tool • Tighten workpiece holding method • Regrind with smaller relief angle • Reduce depth of cut • Shorten LOC, place shank further up holder
Short Life	• Cutter/workpiece friction • Hard material • Poor material condition • Improper cutter angle • Poor coolant	• Use coated tool • Use coated tool • Use coated tool, clean material surface • Regrind with proper primary relief angle • Replace coolant or correct mixture
Chip Packing	• Feed rate too high • Low cutting speed • Insufficient chip room • Insufficient coolant	• Reduce feed rate or increase speed • Increase RPM or reduce feed rate • Use tool with less flutes, increase helix • Increase volume of coolant
Poor Surface Finish	• Feed rate too high • Low cutting speed • Tool wear • Edge build up • Depth of cut too large • Chip welding	• Reduce feed rate • Increase RPM • Replace or regrind tool • Increase RPM, switch to higher helix tool • Reduce depth of cut • Increase volume of coolant
Burring or Workpiece Chipping	• Tool wear • Improper helix angle • Feed rate too high • Depth of cut too large	• Replace or regrind tool • Change to recommended helix angle • Reduce feed rate • Reduce depth of cut
Workpiece Inaccuracy	• Loose/worn toolholder • Poor toolholder rigidity • Poor spindle rigidity • Insufficient number of flutes • Tool deflection	• Repair or replace • Replace with shorter/more rigid toolholder • Use larger spindle or different machine tool • Use tool with higher flute quantity • Shorten LOC, place shank further up holder

Trouble Shooting for Ultra-Tool® Carbide Drills

Problem	Cause	Solution (see key below)
Heavy Wear at Outer Edge	• Insufficient coolant • Incorrect speed & feed	• 5, 6 • 1, 2, 8
Chipping at Outer Cutting Edge	• Loose tool, tool movement • Workpiece movement • Poor coolant conditions • Incorrect speed & feed	• 8, 10, 11, 12, 14, 16, 17, 21 • 8, 12, 13, 21 • 5, 6 • 1, 2, 3, 4
Drill Point Chipping	• Loose tool, tool movement • Incorrect speed & feed • Drill centering	• 10, 11, 12, 14 • 1, 2, 3, 4 • 8, 10, 11, 12, 21
Margin Wear	• Drill margin rubbing wall • Poor chip evacuation • Poor coolant conditions • Workpiece movement	• 20 (check drill for backtaper) • 5, 6, 8, 20 • 5, 6 • 8, 13, 21
Tool Breakage	• Loose tool, tool movement • Workpiece movement • Wrong drill type • Poor coolant conditions • Incorrect speed & feed	• 8, 10, 11, 12, 14, 16, 17, 21 • 8, 12, 13, 21 • 9, 15, 16, 18, 19, 20 • 5, 6 • 1, 2, 3, 4
Poor Tool Life	• Incorrect speed & feed • Poor coolant conditions • Wrong drill point	• 1, 2, 3, 4 • 5, 6 • 8, 21
Drill Walk	• Incorrect speed & feed • Tool wear • Wrong drill point • Material condition	• 1, 2 • 7, 8, 21 • 8, 10, 11, 21 • 11, 12, 15, 16, 17
Chip Welding	• Poor coolant conditions • Wrong drill type	• 5, 6 • 19, 20
Hole Size Inaccuracy	• Incorrect speed & feed • Poor coolant conditions • Loose tool • Wrong drill type	• 1, 2, 3, 4 • 5, 6 • 14 • 9, 18
Non-Cylindrical Hole	• Loose tool, tool movement • Workpiece movement • Incorrect speed & feed • Wrong drill type	• 8, 10, 11, 12, 14, 16, 17 • 13 • 1, 2 • 18, 21
Heavy Burr	• Incorrect speed & feed • Incorrect drill point	• 1, 2 • 8, 21
Blue Chips	• Poor coolant conditions • Tool wear	• 5, 6 • 7, 8
Long Chips	• Poor point grind • Incorrect speed & feed	• 8 • 1, 2

Solutions Key for Drills

1) Reduce RPM	8) Repoint drill	15) Use straight flute
2) Increase feed	9) Correct drill type/size	16) Use stub length
3) Increase RPM	10) Use self-centering drill	17) Place further up holder
4) Reduce feed	11) Spot/center drill	18) Use three-flute
5) Increase coolant	12) Clean surface	19) Use slower helix
6) Increase mixture	13) Improve rigidity/clamp	20) Use parabolic design
7) Add negative hone	14) Tighten holder	21) Change point style

Trouble Shooting for Ultra-Tool® Carbide Reamers

Problem	Cause	Solution
Chatter	• High cutting speed • Feed rate too low • Workpiece movement • Toolholder rigidity • Tool rigidity	• Lower RPM or increase feed rate • Increase feed rate • Tighten workpiece rigidity • Tighten toolholder or reduce float • Use shorter tool, place further up holder
Tool Wear / Chipping	• Incorrect feed rate • Incorrect speed • Poor hole condition • Abrasive material • Poor chip evacuation • Poor coolant • Insufficient coolant • Workpiece alignment • Excessive stock removal	• Increase feed rate (typically) • Reduce speed (typically) • Work-hardened hole; change drilling type • Use proper coolant, coated reamer • Use/increase coolant, use helical reamer • Replace coolant or correct mixture • Increase coolant volume • Use bushing, floating holder, lead chamfer • Use larger diameter starter drill
Tool Breakage	• Incorrect feed rate • Incorrect speed • Tool wear • Bottoming of hole • Coolant conditions • Insufficient stock removal • Poor set up • Excessive stock removal	• Increase feed rate (typically) • Reduce speed (typically) • Sharpen or replace reamer • Adjust stop depth, check preset • Increase, replace, or correct coolant • Use smaller diameter starter drill • Use bushing, floating toolholder • Use larger diameter starter drill

Problem	Cause	Solution
Poor Finish	• Feed rate too low • Insufficient stock removal • Poor hole condition • Poor coolant • Insufficient coolant	• Increase feed rate • Use smaller diameter starter drill • Work-hardened hole; change drilling type • Replace/correct coolant mixture • Increase coolant volume
Hole Tolerance	• Workpiece alignment • Incorrect tool size • Material shrinkage • Tool wear • Toolholder runout	• Use bushing, floating toolholder • Check diameter of tool • Adjust diameter for shrinkage; more coolant • Sharpen or replace tool • Adjust or replace toolholder

Application Data for High Performance Series 323, 355, 377, & 365 Series ULTRATOOL® End Mills

The milling data presented below is for the **323**, **355**, **377**, and **365** Series of Ultra end mills. When using SmoothCoat & SmoothEdge surface treatments, Surface Feet or Meters Per Minute can be increased from the stated levels by at least 25%.
Do not use a radial DOC exceeding more than 25% of diameter for Series 355 only.

Peripheral Milling data based on axial depth ≤ 100% of tool diameter & radial depth of ≤ 25% of tool diameter.

Slot Milling data based on axial depth of cut = 50% of tool diameter.

End Mill Specifications:
Diameter: +.000 / −.002
Shank Diameter: +.0000 / −.0003
LOC: +.060 / −.000
OAL: ± .060
Helix: ± 2°

Application Data for Series 323, 355, 377, and 365 High Performance End Mills (continued); Peel Milling

Recommendations are based upon a **radial cut depth of 10%** of the end mill's diameter and **axial cut depth of 50–85%** of the tool's LOC.

Peel milling can be performed wet or dry (with AT coating); please consult **technical@toolalliance.com** for specific application data.

See it run now!
Scan the Quick Code and watch the Series 365 milling various materials on the Tool Alliance YouTube channel.

Series 323, 355, 377, and 365 Peel Milling

Application Data for Standard ULTRATOOL® End Mills

The milling data presented below is for all "standard" Series of Ultra end mills (data is presented separately on each respective product page for our application-specific high performance designs). Note: When using SmoothCoat & SmoothEdge surface treatments, Surface Feet or Meters Per Minute can be increased from the stated levels by at least 25%.

Peripheral Milling data based on axial depth ≤ 100% of tool diameter & radial depth of ≤ 25% of tool diameter.

Slot Milling data based on axial depth of cut = 50% of tool diameter.

End Mill Specifications:
Diameter: +.000 / -.002
Shank Diameter: +.0000 / -.0003
LOC: +.060 / -.000

Application Data for ULTRATOOL® Reamers

Spiral flutes produce the best hole finish. Right-hand spiral should be used for blind holes, while left-hand spiral is excellent for thru-hole applications. Straight flute is appropriate for all general reaming requirements.

Cutting Diameter: +.0002 / -0
Shank Diameter: ±.0005
LOC: ±.030
OAL: ±.060
Helix (RH & LH): 12°
Lead Angle: 45°

All Ultra-Tool® reamer products are manufactured from Ultra-Carb®. Carbide reamers constructed with steel shank are induction-brazed (using controlled-frequency amplification) and slow-cooled in our own factory for maximum strength. All products are manufactured with centers (male, female, or both) for high concentricity characteristics and resharpening capabilities. Also, shanks are ground to the next smallest common fractional diameter for effective tool-holding and practicality. Note: Series 411 has oversized shank with clearance neck and does not feature centers.

new! Now available with TA coating!

Application Data for ULTRATOOL® Slitting Saws

All Ultra-Tool® Saw products are manufactured from Ultra-Carb®. Use a higher RPM and lower feed ratios than in most cutting tool applications. Use light viscosity coolants at most; dry running is acceptable and/or preferred. Concentricity is the single most determining factor in an efficient slotting operation.

new! Now available with standard SmoothCoat!

Saw Specifications:
Diameter: ±.015
Hole (ID): +.0005 / -.0000
Thickness: ±.00025

1"	25.4 mm	36	7,500 - 20,000	22,000

*Speeds are for Standard Cut. Reduce by approximately 25% with addition of Dura-Cut. Fine Cut increases flute count approximately 50%. Decrease speed accordingly. Coarse Cut decreases flute count approximately 20%. Increase speed accordingly. Lower listed speeds when cutting harder ferrous materials.

Ultra-Tool® Burrs feature higher hardness and a greater flute count than most competing brands for increased tool life.

Burr heads and solid carbide burrs are manufactured from Ultra-Carb®. Shanks are high speed steel hardened to a rating of 45-48 Rockwell C.

#1 Standard, #2 Fine, #3 Coarse, #4 DuraCut, #5 CoarseDura #6 FineDura, #7 Fast Mill, #8 Diamond. In the event of extended lead times the next closest cut style within the same pricing category may be substituted to enhance service levels.

ULTRATOOL® Terms & Conditions

Ordering Information: All Ultra-Tool® products have a Series-Size designator and EDP number. One or both may be used when entering orders via eMail, fax, phone, web, or postal mail communications. If the product is coated, be sure to include the coating suffix.

Availability: Ultra-Tool® products are available primarily through select Industrial Distributors and catalog houses worldwide. Locally, your Industrial Distributor can provide communication, technical assistance, and inventory support. Standard products are subject to prior sale.

Pricing: All prices shown are effective December 2, 2019, supersede and cancel all previous listed prices, and are subject to change without notice. The amount of any present or future sales tax, value-added tax, or similar tax applicable to the products listed herein shall be added to the purchase price and paid by the customer. All sales made at list price less standard applicable distributor discount. Contract pricing must be obtained in writing via current quotation, with stated pricing, effective date, and expiration date, to be valid.

Shipping: Preferred carriers are UPS ground services, Federal Express Express Saver (Guaranteed 3-Day), and Federal Express premium services. Prices quoted herein are F.O.B. our Factory in Huntington Beach, California, U.S.A.

Terms: Domestic and Export Net 30 Days.

Minimum Charge: $50.00 Net.

Returned Items: Current catalog items are returnable subject to a 25% handling charge and approval by the Ultra-Tool® Inspection Department. Credit cannot be issued for any product that has in any way been modified, machined, altered, coated, marked, or displaying other characteristics that render it in a "used" condition. A Returned Goods Authorization (RGA) number must be obtained from the Ultra-Tool® Sales Department prior to return. Returned product must be sent to the Factory for credit; consignment locations are not capable of issuing either RGA's or credit memos. Special tools are not returnable. Due to technical advancements, products sold 3 years ago and prior are not returnable.

Specials Policy: We reserve the right to overship or undership and invoice special tools up to a 10% variance per item. Quantities under 10 are subject to a one piece variance. Any variations to this policy must be stated in advance as it will affect pricing upon quotation. Special orders cannot be cancelled without prior approval and proper consideration.

Product Warranty: Ultra-Tool® warrants that products sold by it shall be free from defects in materials and workmanship. Ultra-Tool will replace, repair, or grant credit for any product which does not comply with this warranty. This warranty does not apply to any products which have been in any way modified, machined, misused, subjected to accident, or used beyond normal life. Warranty claims should be made through the distributor from whom the product was purchased. There are no other warranties, expressed or implied, made by us except as expressed above, and we neither assume nor authorize any other firm or person to assume for it any other obligation or liability in connection with our products.

Cooperative Advertising: Ultra-Tool® does not participate in any cooperative advertising programs with either industrial distributors or manufacturer's representatives. This policy allows us to avoid any possible favoritism or conflicts of interest, and keeps costs and sales prices as low as possible.

ULTRATOOL® is friendly to the environment. All paper products are separated for reuse and shredded for packaging materials. Shipping boxes are reused when possible. Conservation programs are in place for reduced energy use (additionally, our coastal location eliminates the need for artificial heating or cooling on most days). All displaced materials during the manufacturing process are collected, separated, and returned to a materials recycler. Coolants are recycled when appropriate. Mop water is evaporated and resultant sediment is properly disposed. Skylights provide natural lighting and reduce electricity usage.

Visit our factories on your next trip to the greater Los Angeles / San Diego, CA area (solid carbide) or Fort Myers / Naples, FL (indexable). View our automated facilities, meet our Associates, and tell us how we can better grow our relationship together. Huntington Beach is officially "Surf City" with miles of open beach on the Pacific Ocean, and we're minutes away from attractions such as Disneyland, Knott's, Universal Studios, Reagan and Nixon Presidential Libraries, Getty Museum, Dodger Stadium, Staples Center, Angel Stadium, Honda Center, The Alliance Club, and the list goes on. The closest airport is Orange County (SNA), followed by Long Beach (LGB), Los Angeles (LAX), and then Ontario (ONT). Fort Myers (airport code RSW) is on the beautiful Gulf of Mexico coast, a recreational haven, home to Major League Baseball spring training, and within a 3-hour drive to Orlando, Tampa Bay, Sarasota, Miami, Fort Lauderdale, the Everglades, and more.

Ultra-Tool® sales features:

- The Company has a well known brand, superb quality reputation, and a 45-year operating history.
- Ultra-Tool is dedicated solely to the solid carbide rotary tooling industry.
- We are privately held, operate with long-term focus and goals, and manufacture our products within our company-owned factories.
- Our substrate, geometry, and coating are specially selected for each application and Series.
- Our cutting tools have extremely accurate diameter, radius, and concentricity characteristics.
- All solid carbide Ultra-Tool products are "SFR" (Shrink-Fit Ready).
- Our grinding method and coating process yields an extremely sharp and long lasting cutting edge.
- We offer a full line of standard tools including "hard to find" items.
- We offer proprietary coatings such as TiB2 (A1) and HSN² (AT), all performed in-house for quick delivery.
- We can stock firm blanket orders.
- We offer quick turnaround on special blueprint items.
- We have a great mix of Automation and Craftsmanship.
- Both fractional and metric size ranges are offered.
- We have sales offices in both coastal time zones (Florida and California).
- We strongly support traditional Industrial Distribution.
- We have large standard inventories and excellent service levels.

Visit our web sites for new products, services, events, and features.

About the technology of Ultra-Tool® & Tool Alliance®:

We obsess over details that create the finest cutting tools available. Our reward is customer satisfaction via increased factory productivity. We cannot be the best without thinking differently, so over a 45 year operating history we've developed proprietary technologies that yield significant characteristics of cutting tools unlike any you'll find elsewhere:

ULTRATOOL® TA

- SmoothGrind® = **Polished cutting edges for extreme sharpness and lubricity.**
- SmoothContricity® = **Precision grinding, tool holding, and tolerances for minimized TIR.**
- SmoothCoat® = **Sputter-based SuperNitride PVD coating for superior surface hardness & uniformity.**
- SmoothEdge® = **Surface and edge preparation for lubricity and minimized break-in.**

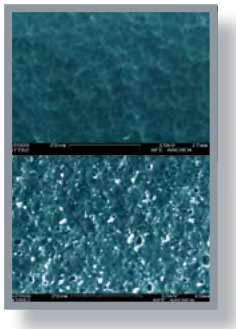
Sharpness & Lubricity.
No wonder it works better.

SmoothGrind®

Tight tolerances.
Minimized run-out.

SmoothContricity®

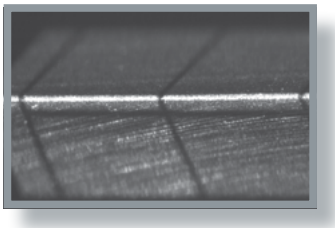
Our coating @ 2,000X (top).
Everybody else's (bottom).



SmoothCoat®

Edge Integrity.
Runs great on the first pass.

Ultra-Tool end mill cutting edge magnified to display SE4 hone.



SmoothEdge®
